

PERMIT APPLICATION PROCESS NOTICE New Drinking Water Operating Permit for Existing Public Water System

According to the Safe Drinking Water Act, any water system that supplies more than 25 people or 15 service connections per day for at least 60 days per year is classified as a public water system (PWS). For complete requirements for public water systems, please refer to the Arizona Administrative Code Title 18, Chapter 4. Copies are available from the office of the Arizona Secretary of State or online at www.azsos.gov. The following requirements may need to be completed prior to issuing a new permit for an existing PWS:

- 1. Drinking Water System Compliance Review.** A Drinking Water System Compliance Review (CR) must be requested no more than 30 days prior to submission of this application to determine the existing PWS permit's compliance status with all applicable PWS rules and regulations. The CR request must be submitted with the current schedule fee of **\$250**.
- 2. Certified Operator.** All public water systems must obtain the services of a certified water operator. Operators monitor the water for various contaminants throughout the year, including bacteria, nitrate, nitrite, lead, and copper. A certified operator must inspect each well site a minimum of once per month. If an employee or associate of the system may wish to become certified, you may contact Noah Adams of ADEQ at (602) 771-4511 or refer to the ADEQ web site www.azdeq.gov for more information on operator certification.
- 3. New Source Approval.** New Source Approval (NSA) is required for all water sources used by the PWS. Public water systems will be required to obtain additional source approvals if the water source has been inactive for more than 12 consecutive months or suspected source contamination has occurred. Source Approval applications may require a chemical analysis of some or all regulated contaminants in the source water in addition to a copy of the Arizona Department of Water Resources registration for a well, a well driller's log and the scheduled NSA application review fee of **\$425**.
- 4. Engineering Approval.** Arizona law requires water system components, including wells, treatment plants, storage and pressure tanks, distribution mains, and booster pumps, to obtain Approvals to Construct and Approvals of Construction. The system must complete these applications and submit plans sealed by a Professional Engineer with required scheduled review fees. Please contact Cindy Furze at (602) 506-1058 for more information on engineering requirements.
- 5. MAP.** Community and Non-Transient, Non-community water systems that serve fewer than 10,000 people are required to participate in ADEQ's Monitoring Assistance Program (MAP). MAP performs much of the required sampling for systems, but does not sample for bacteria, lead, copper or disinfection by products. Please contact Mary Kay Black of ADEQ at (602) 771-4518 for more information, including program fees.
- 6. Operating Permit Issuance.** After the existing PWS receives all applicable approvals listed in requirements 1-5 above, the applicant will be sent a Maricopa County PWS permit application and associated invoice. Once the signed PWS permit application and appropriate scheduled annual permit fee is received by the department, the drinking water operating permit will be issued to the permit owner/holder.

The Department will approve or deny this application in 83 business days (16 day - Administrative Review, 67 day - Substantive Review) excluding any days the application is returned to the applicant for additional information. You may request a clarification from the Department of its interpretation or application of a statute, ordinance, regulation, delegation agreement or authorized substantive policy statement as provided in A.R.S. §11-1609. Contact us by e-mail, regular mail, telephone, or in person at the address listed at the top of the page, marked attention Drinking Water Program (DWP). The DWP Application Clerk is the contact for information regarding this application and can be reached at (602)506-6935 or sdwquestions@mail.maricopa.gov with any questions. Additional application information may also be found on our program website at <http://www.maricopa.gov/2350/Drinking-Water>.

Maricopa County Environmental Services Department

APPLICATION FOR NEW DRINKING WATER OPERATING PERMIT FOR EXISTING PUBLIC WATER SYSTEM

All fields are required to be completed. Incomplete applications will not be accepted.

Please Note: According to the Safe Drinking Water Act (SDWA), any water system that supplies more than 25 people or 15 service connections per day for at least 60 days per year is classified as a public water system. This application must be completed by the new public water system permit owner/holder or authorized representative. A Drinking Water System Compliance Review must be requested no more than 30 days prior to submission of this application to determine the existing PWS permits compliance status with all applicable public water system rules and regulations.
